Day 3/180 Introduction to c++

• Print number

- 1. Two numbers are given, print their product
- 2. Two numbers are given a and b, print a-b
- 3. Print 6*3 in output, don't print 18, just 6*3 should be in the output screen.
- 4. If we have only 4 bits, How 3 and -6 will be written in 4 bits.
- 5. If we have only 5 bits, How 13 and -16 will be written in 5 bits.
